

An illustration of a hairy leg and foot, rendered in a stylized, cartoonish manner. The leg is light brown with numerous short, dark brown hairs. The foot is a lighter, yellowish-brown color, also with short hairs. The leg is positioned vertically on the left side of the frame, with the foot pointing downwards and slightly to the right. The background is a solid blue color.

Work outside much?

ALMOST ALL **SKIN CANCER** IS
CAUSED BY OVEREXPOSURE TO
UV FROM THE SUN.

Not all skin cancers look the same, but if you have spots that look and feel different, have changed size, shape, colour or texture, or sores that don't heal within a few weeks or that are itchy or bleed, make an appointment with your GP straight away. Your GP can check your skin and you have a better outcome when skin cancer is found and treated early.

Talk to your doctor.
Catch skin cancer early.
